

out in Kearney earlier this spring and it is an outstanding program. It's one that if you ever have an opportunity to witness it, you should participate in it. The Papillion-LaVista High School group entered four teams into competition. There were four areas of where high school teams could participate. The Papillion-LaVista team saw three of those four teams win state championships. It's the...I think the first time in history that such...one school had as many winners as Papillion-LaVista High School team did. One of them that was amazing competition for me, being engineering illiterate, one of the problems that they were given was they were given 16 grams of balsa wood and they were supposed to create a structure to hold as much weight as they could hold. And the Papillion-LaVista team built a structure with 16 grams of balsa wood that hold all...held almost a thousand pounds. It was twice as much as the second place winners. It was a phenomenal feat of engineering for a group of high school students. They really did an excellent, as you found out from Senator Hillman yesterday and from Senator Robak a few days earlier. This is an outstanding program. I'm just very proud of the way the Papillion-LaVista High School team performed and I would appreciate your support for this resolution to congratulate Papillion-LaVista High School Odyssey of the Mind teams and their coaches. So they will be journeying on to international competition in June in College Park, Maryland. We all wish them well. And would support...would appreciate your support for the resolution.
